

SHASHIKANT V. SUTAR

Quality Assurance Lead | Manager | AI/Gen AI Testing | 16+ Years of Experience

• +91-7798981603 • sv.sutar@gmail.com • Pune, India | UK Onsite Experience

• LinkedIn: <https://www.linkedin.com/in/shashikant-sutar1603/>

• Portfolio: shashikant.github.io • GitHub: <https://github.com/Shashikant/>

PROFESSIONAL SUMMARY

Results-driven QA Lead with 16 years of end-to-end quality assurance and test automation expertise across iGaming, eCommerce, and Retail domains. Proven track record of building high-performing QA teams (up to 16 members), reducing defect leakage by 25%, and delivering production-ready software on schedule. Experience in testing AI/ML/GenAI products—including autonomous test case generation, intelligent test healing, and AI-powered test orchestration. Advanced hands-on expertise in Playwright (JavaScript/TypeScript), API testing (Postman), performance testing (JMeter), TDD/BDD frameworks (Cucumber), and CI/CD integration. Experienced in leading UK onsite client engagements, agile delivery, and architecting next-generation intelligent test automation solutions that leverage AI agents and ML-driven test maintenance.

CORE COMPETENCIES

AI/GenAI Testing: Autonomous Test Generation | Intelligent Test Healing | AI-Powered Test Orchestration | Test Automation with Claude AI Agents | MCP Server Integration

Specialized Testing Stack: Playwright (Advanced, JavaScript/TypeScript) | BDD/Cucumber | TDD Framework Design | Postman API Testing | JMeter Performance Testing | Selenium (Basic)

Testing Disciplines: Functional | Regression | API | Performance | Integration | E2E | Exploratory | SIT | UAT | Risk-Based Testing

Test Management & QA Strategy: QA Strategy Definition | Test Planning | Test Case Design | Defect Lifecycle Management | Release Sign-Off | Agile/Scrum

Tools & Platforms: Playwright | Postman | JMeter | JIRA | TestRail | Azure DevOps | GitLab | Bitbucket | Jenkins | GitHub | Cucumber | Claude AI

Leadership & Soft Skills: Team Leadership (16+ direct reports) | Stakeholder Management | Agile Team Coordination | Mentoring | KPI Reporting | Problem-Solving

PROFESSIONAL EXPERIENCE

Playwright E2E Testing Framework with AI-Driven Test Healing

Recent Project | 2026

- Architected production-ready end-to-end test automation framework using Playwright + TypeScript, covering critical user journeys with automated story-to-test workflow integration.
- Implemented JIRA story-driven test script generation—automated framework reads user stories directly from JIRA, generates test cases, and maintains full traceability between requirements and test coverage.
- Engineered self-healing test mechanisms using AI agents (Claude) to automatically repair broken selectors and assertions, reducing manual regression maintenance effort by improving test resilience and reducing flakiness.

- Established full CI/CD integration—automated test execution on code commit, Git-based test script management, failure notifications, and remediation workflows for failed tests.
- Delivered end-to-end automation solution from conception to production deployment: architecture design → Script implementation → Test healing → Git integration → CI/CD pipeline configuration.
- Technology Stack: Playwright, TypeScript, Claude AI API, JIRA API integration, Git, Jenkins/GitHub Actions, self-healing test patterns

QA Manager | AI/GenAI Testing Lead

Ingenuity Gaming Pvt. Ltd., Noida | Apr 2025 – Mar 2026

- Defined and owned end-to-end QA strategy for iGaming products with focus on AI/GenAI product testing, ensuring regulatory compliance and production readiness.
- Tested autonomous test case generation using AI agents (Claude + MCP servers), validating correctness, coverage, and applicability of AI-generated test scenarios.
- Validated intelligent test healing—AI-driven repair of broken test selectors and assertions—reducing test maintenance overhead by improving test resilience and self-healing capabilities.
- Performed API testing (Postman) for iGaming platform services, designing comprehensive REST API test suites covering payment processing, player accounts, and game state management.
- Designed and maintained Playwright automation framework (JavaScript/TypeScript) for iGaming slot machine games; integrated MCP servers with GitHub Copilot for autonomous test orchestration.
- Conducted functional, regression, integration, and end-to-end testing across casino and gaming platforms; collaborated with Product, Development, Compliance, and Operations.
- Drove QA process improvements that reduced production defects and raised release quality standards across the product lifecycle.
- Led manual and automation testing initiatives; defined acceptance criteria for automation deliverables to improve maintainability of long-term test suites.

Senior QA Professional – Test Analyst to Associate Project Manager

Expleo Solutions Ltd., Pune | Nov 2009 – Mar 2025 (15+ Years)

- Career Progression: Test Analyst (2009–2012) → QA Coordinator (2013–2020) → QA Lead (2021–2022) → Associate Project Manager – Quality Assurance (2023–2025)
- Managed global Retail and iGaming QA delivery, ensuring full test coverage, regulatory compliance, and on-time defect closure across multiple release cycles.
- Led a 16-member QA team serving UK iGaming clients, overseeing resource planning, timelines, performance metrics, and cross-functional coordination between onsite (UK) and offshore (India) teams.
- Reduced defect leakage by ~25% through improved test coverage strategies, peer reviews, root-cause analysis, and data-driven QA metrics reporting.
- Architected Playwright automation framework (JavaScript/TypeScript) for Oracle ERP applications; integrated MCP servers with AI agents for autonomous test generation and intelligent test healing.
- Performed API testing using Postman for ERP and financial applications; designed and executed comprehensive test suites for REST APIs covering GL, AP, AR, and Purchasing modules.
- Conducted performance and load testing using JMeter for retail and iGaming applications; validated system behavior under high concurrency, spike testing, and sustained load scenarios.
- Defined test strategies, quality gates, test plans, and defect management protocols; collaborated closely with business analysts, developers, and product stakeholders.
- Executed end-to-end QA across SIT, UAT, regression testing, and release sign-off; tracked and validated defects in JIRA and ALM with full closure accountability.

- Supported UK onsite client engagements, managing communication, stakeholder expectations, and KPI reporting; mentored junior QA team members on testing best practices and technical standards.
- Trained offshore QA teams on Agile methodologies, test automation frameworks, and quality standards; drove consistent delivery across geographically distributed teams.

Junior Software Engineer

Remote Control Media Info-Technologies (P) Ltd., Pune | Mar 2009 – Aug 2009

- Developed and tested features for a local business discovery and marketplace platform; gained hands-on expertise in search-based systems, user/business profile management, and multi-stakeholder product workflows.

Junior Software Support Engineer

Globalware System and Software Solutions Pvt. Ltd. | Feb 2007 – Apr 2008

- Delivered end-to-end user training, software customization, and requirements validation for Excise Software platform in Manufacturing/Trading sector; ensured software configurations aligned with business process requirements.

DOMAIN EXPERIENCE

- iGaming: Casino platforms, game launches, backend testing, compliance validation, player experience optimization, autonomous test generation for game logic
- Retail: Functional testing aligned with retail business strategies, supply chain compliance, operational readiness
- E-Commerce & Marketplace: Business discovery platforms, search systems, user/business profile management
- Manufacturing & Excise: ERP systems, regulatory compliance testing, customs/excise tax software customization

CERTIFICATIONS

- ISTQB Certified Tester – AI Testing
- ISTQB Advanced Level – Test Analyst
- ISTQB Foundation Level – Agile Tester
- ISTQB Foundation Level – Software Testing

EDUCATION

Bachelor of Engineering – Electronics & Telecommunications
PCCOE, Pune University, Maharashtra | Nov 2005
